Report on Plastics Free Village

Activity	Awareness on Plastics Free Village
Date	05-06-2017
Place	Selapadu
No of participants	40
Academic Year	2017-18

The NSS unit of VLITS, Vadlamudi organized an awareness program on Plastics Free Village. The NSS students explained about use of plastic and it's harmful effects at Selapadu on 05.06.2017. It is a first of its kind initiative by United Way India (Community Service Organization) to highlight the need for reducing plastic consumption and compel a healthier way of managing trash. Chlorinated plastic has the potential to leak dangerous chemicals into the soil around it. These chemicals can then seep into nearby water sources, including groundwater, and the ecosystem. In this program 40 students have participated along with faculty members.
