Report on Tree Plantation: A Step to Green Campus Initiatives

Activity	Tree Plantation: A Step to Green Campus Initiatives
Date	22.11.2017
Place	College Campus
No of participants	75
Academic Year	2017-18

Long-term contributions made by trees to their surroundings include oxygen production, better air quality, a more favourable climate, water and soil conservation, and the support of wildlife. Trees absorb carbon dioxide during photosynthesis and turn it into the oxygen we breathe. VLITS-NSS unit conducted a program on tree plantation program step to **Green** campus Initiatives on 22.11.2017. In this camp, around 75 NSS students participated to plant the plantations in the college premises.
