Report on Pollution prevention Awareness Program at Vadlamudi Village

Activity	Pollution Awareness Program at Vadlamudi Village
Date	02.12.2021
Place	Vadlamudi Village
No of participants	42
Academic Year	2021-22

All actions that already do cause pollution, including those in the energy, agricultural, government, consumer, and industrial sectors, can be prevented. For the preservation of wetlands, groundwater supplies, and other crucial ecosystems areas where we particularly want to halt pollution before it begins prevention methods are crucial. Pollution control in the energy sector can lessen the environmental harm caused by the extraction, processing, transportation, and combustion of fuels.

The NSS unit of VLITS has Organized Pollution Awareness Program at Vadlamudi village on 02.12.2021. It is the duty of every human being to take care of the earth. A batch of 42 NSS students participated in this program. The NSS student created awareness by using stickers, handouts and public information systems. Finally, NSS coordinator appreciated all the students for the great awareness program.
