Report on Awareness on "Post COVID -19 Measures for students"

Activity	Awareness on "Post COVID -19 Measures for students "
Date	22.11.2021
Place	College Campus
No of participants	85
Academic Year	2021-22

Every COVID-19 patient has the potential to develop a post COVID-19 condition. Numerous professionals worldwide are researching post COVID-19 disease, and as a result, our understanding of this condition is expanding. The majority of COVID-19 patients, between 10 and 20 percent, go on to experience persistent symptoms that could be related to a post COVID-19 syndrome, according to recent research. VLITS, NSS unit has organized a program on Awareness on Post COVID-19 measures for students and faculty as well on 22.11.2021. The resource person Medical officer of VFSTR University has graced the occasion and focused on preventive measures to be taken.
