## COURSE STRUCTURE-R19

| I Year - I Semester | L | T | P | C |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | PROGRAMMING FOR PROBLEM SOLVING USING C LAB (ES1202) | $\mathbf{0}$ | $\mathbf{3}$ | 1.5 |

## Course Objectives:

1) Apply the principles of $C$ language in problem solving.
2) To design flowcharts, algorithms and knowing how to debug programs.
3) To design \& develop of C programs using arrays, strings pointers \& functions.
4) To review the file operations, preprocessor commands.

## Exercise 1:

1. Write a C program to print a block F using hash (\#), where the F has a height of six characters and width of five and four characters.
2. Write a C program to compute the perimeter and area of a rectangle with a height of 7 inches and width of 5 inches.
3. Write a C program to display multiple variables.

## Exercise 2:

1. Write a C program to calculate the distance between the two points.
2. Write a C program that accepts 4 integers $p, q, r, s$ from the user where $r$ and $s$ are positive and $p$ is even. If $q$ is greater than $r$ and $s$ is greater than $p$ and if the sum of $r$ and s is greater than the sum of p and q print "Correct values", otherwise print "Wrong values".

## Exercise 3:

1. Write a C program to convert a string to a long integer.
2. Write a program in C which is a Menu-Driven Program to compute the area of the various geometrical shape.
3. Write a C program to calculate the factorial of a given number.

## Exercise 4:

1. Write a program in C to display the n terms of even natural number and their sum.
2. Write a program in C to display the n terms of harmonic series and their sum. $1+1 / 2+1 / 3+1 / 4+1 / 5 \ldots 1 / n$ terms.
3. Write a C program to check whether a given number is an Armstrong number or not.

## Exercise 5:

1. Write a program in C to print all unique elements in an array.
2. Write a program in C to separate odd and even integers in separate arrays.
3. Write a program in C to sort elements of array in ascending order.

## Exercise 6:

1. Write a program in C for multiplication of two square Matrices.
2. Write a program in C to find transpose of a given matrix.

# JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY: KAKINADA KAKINADA - 533 003, Andhra Pradesh, India <br> DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING 

## COURSE STRUCTURE-R19

## Exercise 7:

1. Write a program in C to search an element in a row wise and column wise sorted matrix.
2. Write a program in C to print individual characters of string in reverse order.

## Exercise 8:

1. Write a program in C to compare two strings without using string library functions.
2. Write a program in C to copy one string to another string.

## Exercise 9:

1. Write a C Program to Store Information Using Structures with Dynamically Memory Allocation
2. Write a program in C to demonstrate how to handle the pointers in the program.

## Exercise 10:

1. Write a program in C to demonstrate the use of \& (address of) and *(value at address) operator.
2. Write a program in C to add two numbers using pointers.

## Exercise 11:

1. Write a program in C to add numbers using call by reference.
2. Write a program in C to find the largest element using Dynamic Memory Allocation.

Exercise 12:

1. Write a program in C to swap elements using call by reference.
2. Write a program in C to count the number of vowels and consonants in a string using a pointer.

## Exercise 13:

1. Write a program in C to show how a function returning pointer.
2. Write a C program to find sum of $n$ elements entered by user. To perform this program, allocate memory dynamically using malloc( ) function.

## Exercise 14:

1. Write a C program to find sum of n elements entered by user. To perform this program, allocate memory dynamically using calloc( ) function. Understand the difference between the above two programs
2. Write a program in C to convert decimal number to binary number using the function.

## Exercise 15:

1. Write a program in C to check whether a number is a prime number or not using the function.
2. Write a program in $C$ to get the largest element of an array using the function.

## Exercise 16:

1. Write a program in C to append multiple lines at the end of a text file.
2. Write a program in C to copy a file in another name.
3. Write a program in C to remove a file from the disk.

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY: KAKINADA KAKINADA - 533 003, Andhra Pradesh, India
DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

## COURSE STRUCTURE-R19

## Course Outcomes:

By the end of the Lab, the student

1) Gains Knowledge on various concepts of a $C$ language.
2) Able to draw flowcharts and write algorithms.
3) Able design and development of C problem solving skills.
4) Able to design and develop modular programming skills.
5) Able to trace and debug a program
